

# Shimmerz Fact Sheet

Shimmerz are highly iridescent, waterbased, acid free and non-toxic paint. They adhere to nearly anything including metal and acetate and dry within minutes. They come in a sealed 1/4 oz jar premixed and ready to use.

## Can be used on

- ✿ Paper
- ✿ Vellum
- ✿ Acetate
- ✿ Ribbon and lace
- ✿ Fabric and felt
- ✿ Flowers, paper and fabric
- ✿ Metal embellishments
- ✿ Buttons
- ✿ Chipboard
- ✿ Alphabets eg thickers, felt, chipboard or fabric letters to give them new life.
- ✿ Photos
- ✿ Anything you can think of really, there are no limits.

## Techniques

- ✿ Stamp with it (Tip: use a fine brush and work out of the lid. Use a light dabbing motion to apply shimmerz directly onto your stamp instead of strokes and you will avoid a build up of paint in the recessed pieces of your stamp and your impression will be much better).
- ✿ Use it to highlight certain pieces on patterned papers.
- ✿ Paint raw chipboard.....it comes up fabulous.
- ✿ Perfect for use on stamped images. I particularly love using it with magnolia stamps on the wings of the images.
- ✿ Water down a small amount and use it as a background wash on a project.
- ✿ Apply several layers to get more depth of colour.
- ✿ Use on a photo to highlight a ribbon in a child's hair for example or any special little details.
- ✿ Use on your timber off the page projects for a nice vintage look.

## Facts

- ✿ Shimmerz can separate between uses, simply stir with the end of your paint brush or a toothpick.
- ✿ If it looks like your shimmerz are drying out...simply add a small amount of distilled water to revitalise them.
